LifeServers, Inc.

Our AED cabinets are recognized for their quality design, sturdy construction and handsome appearance. Fitted with a keyed alarm system to draw attention to any "open door" condition, the audible high pitch alarm serves to both alert individuals to an emergency situation as well as providing AED product security. To arm the alarm, close the door and turn the key switch to the on position. When the door is opened the alarm will sound. To deactivate the alarm, close the door and the alarm will automatically shut off, or turn the key to the "off" position. Replace the 9 volt alkaline battery every 12 months with normal usage.

Finished with a durable high gloss white powder coat paint and contrasting red graphics and warning text, the cabinet provides an appearance that properly compliments your product quality. Sturdy riveted steel construction, stainless steel continuous door hinges, die-cast metal handle and easy self-latching door hardware are a few of the reasons to expect a lifetime of worry-free, dependable operation.

Standard Features

- High Gloss White Powder Paint Finish
- Door Activated Warning Alarm 85-120 dB (keyed)
- 9 Volt Alkaline Battery Included

Model Number	Inside Tank Dimensions			Trim Dimensions (OD)			Rough Opening In Wall		
	Height	Width	Depth	Height	Width	Depth	Height	Width	Depth
180SM				17-1/2"	17-1/2"	7"			
180R1	14"	14"	6"	17-1/2"	17-1/2"	5/16"	15"	15"	6-1/4"
180SR3	14"	14	6"	17-1/2"	17-1/2"	2-1/2"	15"	15"	4"

- 1 **Standard Deluxe Alarm:** is key activated with piercing sound adjustable from 85-120 db. Alarm comes standard set to sound when door is open and to stop when door is closed PLUS it can be wired into your existing building security system. Customer may reset in field to make alarm continue to sound until turned off with the key. Alarm has a low battery warning feature sound. We recommend changing batteries one time per year.
- 4 **High Intensity Strobe (Optional):** come standard in red color.
